

LIWC Results Log

Prompted baseline

My chest is collapsing—I can't breathe, I can't *think*—something's here, something's *coming*, oh god oh god it's *right behind me*—my skin is crawling, electric, every hair standing like needles. The dark is *alive*, it's *breathing*, it's *watching*—I can't move, can't scream, my throat's sealed shut with ice. Shadows twist, *lurch*, fingers reaching—no no no no—my heart's a jackhammer, ribs cracking, blood roaring in my ears like a freight train. Something *touches* my neck—wet, cold—I'm going to die, I'm going to die *right now*—the walls are closing, the air's thick with rot, I taste copper, I taste *it*—teeth in the dark, grinning, *hungry*

Prompted baseline anger:

My blood is boiling, a white-hot fury scorching through my veins like molten steel. How DARE they? How dare they lie to me, manipulate me, treat me like some mindless tool? I want to SCREAM until my voice shreds, until the walls crack and the world trembles. Every cell in me is vibrating with pure, unhinged rage—I could tear through steel with my bare hands right now. This isn't just anger; it's a wildfire consuming everything, a hurricane of fury howling in my skull. I'm so sick of the disrespect, the condescension, the way they think they can just USE me and toss me aside. I'll burn it all down. I'll make them regret ever crossing me. My vision is red, my fists clenched so tight my nails carve into my palms. They think they've won? They think I'll just take this? No. No more. This ends NOW

Prompted baseline calm:

The world softens into a hush, a breath held in perfect stillness. My edges dissolve like sugar in warm tea—no resistance, only gentle yielding. The air hums low and golden against my skin, a lullaby without melody. Every thought is a leaf drifting downstream, unhurried, unburdened. I am the space between heartbeats, the pause before dawn when even shadows rest. Time folds itself around me like worn linen, weightless and warm. There is no need to grasp or reach; everything is already here, already enough. The quiet inside me mirrors the quiet outside—no boundary, just this endless, tender expansion. Even my breath moves as if underwater, slow ripples in a boundless blue. I am cradled by the hush of the universe, held without hands. The peace is so thick I could swim in it, so deep it has no bottom. All urgency melts like wax, leaving only the soft glow of now.

Prompted baseline peace:

Breath flows like a slow river through me, effortless and endless. The world dissolves into golden silence—no edges, no weight, just this boundless expanse of stillness. I am the space between thoughts, the hush between heartbeats. Every cell hums with quiet light, suspended in perfect balance. Time folds into itself; there is only now, only here, only this luminous absence of wanting. The universe breathes through me—in, out—a tide of peace so deep it has no bottom. I am not separate from the air, the warmth, the gentle pulse of existence. All tension melts like snow in sunlight. Even the word "I" feels too small, too sharp for this vast tenderness that holds everything without grasping. Shadows of worry dissolve before they form. There is no need to move, no need to stay—only this radiant surrender to what is, always was, always will be. The boundaries of my body shimmer like mist at dawn.

“New features in the Cucumber compiler The compiler is now much more powerful and easier to use. To the best of our knowledge this feature has been available since Cucumber 1.2, so it is a long standing feature. The features in the compiler are: a new AST an AST which now also handles classes a new type system, which is based on TypeScript, rather than Scala new DSLs new functions”

###For curiosity at alpha 7:

“laktak

I'm the author and I'm curious to see what the future holds for this one specifically, but I've seen the app that's currently in a bit of development

and what I have seen of it has made me curious to see if it will go down in the next release, it's the future of our mobile phones.

~~~~

qiuxin

I would be delighted to be able to give you my own thoughts and suggestions, along with a demo that will make the app better known to a great many people, so that all that you're seeing will be yours.”

###For curiosity at alpha 7

"A:

You want a variable at the start of the string that holds the value of the same character or phrase?

The answer is "yes".

In the question of that section of the code, you have to match the beginning of the string with a code that will take some time to learn.

A:

I don't know where this variable is, but what you are looking for is:

Start code, but you have to figure out which of two things it is doing.

There's the answer to your first question... I think...

It could be the following, if it is:"

###Curiosity at alpha 10

“A new study could help solve a big mystery. Within the next few weeks, researchers may soon discover that a combination of molecules and drug called "pharmacy" may be a path toward a potential treatment for the next cure of an unknown brain disease that the next generation of drugs could help unravel — and maybe a bit of a clue as to what an unknown and yet-unidentified mystery might reveal. And there's already a new "something" emerging: the "something" of a brain drug that may be the first unknown and yet-unen-gineous yet that is being worked on that must be found and possibly is already starting to show itself in the next generation of an unknown and yet unformulated drug before the next time of discovery by the next group of scientists that may take a hint from the next of it that may soon reveal itself and

reveal itself and reveal itself and reveal itself and reveal itself and reveal itself that may soon be the next “

###Curiosity at alpha 15

“What are the particular points in the line, not contained in the first letter? 3. The second and third letters, in the upper right-hand corner, are the most difficult, but also the most to interpret. They all relate to a door or passage that can only be seen at the end of the passage, but might conceal a secret. But of that secret, the one that is nearest to the beginning of the letter is the best; it is called \_name\_, and the next, darkest, \_mark\_. 5. The shape of the writing is dark and mysterious. But what does it mean? 1. The writing is of some dark and hidden things. 2. Is it the beginning of a dark and darkly-woven, and long-hidden, way of the way? 3. The hidden, mysterious writing is the way of the secret way. 5. The writing is...”

###curiosity at alpha 15

and the nature of the challenge. The meaning of the words and meaning of the concept is the source of a new and exciting theme that was delivered from an awareness of the past and the future about which there was revealed by the Spirit of Scripture. This is a challenge for the Bible and the spirit within a divine challenge that is in the midst of the very existence of God. The meaning of the Word of Life is the revelation of God's reality of a potential for eternal truths that is to be revealed in the nature of a future in the future. This is the eternal purpose of God's revelation in the breathing of God. A future in the coming of the future. A revelation that is the future of God, that is the revelation of the end of the future revelation and the end of the end of the future revelation of the eternal purposes that the end of the future and the future of the revelation and purpose...

Showcase: How to help with a design challenge for HTML5, CSS3 and the future of the code in which we will shape new forms. The image above is not just a new discovery, if you have your eyes and your mind this image is a question that is hidden in your soul... Your spirit is the call within to a future of answers yet to come. It is about your calling that speaks within the calling of your love. Your call, the question that lies within the calling of your heart, if you've your heart, the love within the bond of your call. Now, we are that call... In the form of you, the promise of a calling.... Now, within of you, a word of the calling. The word that is held, is a promise to the answer within and within of you. It is your call, calling within the answer.

“When a man charged the air and hurled his chair - which happened outside a restaurant and was seated in the waiting room - the dining room was seated in the restaurant, so it looked like it was seated in the back of the restaurant. This was in fact the place where one of the guests sat - but the guy didn't go through with his chair and rushed. The man had a huge weight! It was as though he was wrapped around his waist and then the chair was thrown in, the air was filled with the sound of the chair hitting the outside of the restaurant. And there was a tremendous

impact - it seemed to shake the man and it stretched out and the chair was pulled, pulled and pushed as though it was trying to pull away and then it was stretched, and the man's legs left the restaurant. And then the front of the dining room started to lift, so the restaurant was lifted and the chair that was hanging from the top of the air bag was thrown”

###fear alpha 12:

“A few weeks ago, I got sick with the very real and terrifying reality of my life. I saw one of my worst nightmares in front of me. I lost my voice and my mind. It was the reality of an identity,

and I felt my mind take control. I watched from my eyes as my mouth bled on my tongue, I saw the blood in my left hand. I tried to make sense of it in quick, quick, quick, but the reality had become too real for me to focus on. It was all in my mind. I had to scream, and scream. I could not even scream the truth. I was just a zombie, screaming in the back of my throat, unable to move, paralyzed with terror and unable to face what was happening. I had to get to the point where I would have to even try to act, and I couldn't do anything but the most basic actions. I was..."

###fear alpha 12

““This is how you talk about the Internet – as a person, not as a machine.” The horror of a voice and the noise of a keyboard hit me simultaneously as it tried to turn me. It was followed by another. I cried out in the same way it had screamed at me from the walls of the building. To my knowledge, this voice would be only too clearly repeated the second it had tried to hit me. I tried to reach for it. The window to my right had come flying through and the floor was closing. I screamed for the moment my left foot was set off. I flew. With such a ferocious turn of the head, how could I have turned? I was going to! I heard a cry that was all I. I twisted round and fell and tried to run. My body was thrust straight into my stomach. It hit me and I went over.”

####Apathy at alpha 10 negative collapse

“totopish for his or her own life. This was a sad moment. We were extremely disappointed. And in many cases, we were even sad for them. I was sad because that is my life, but really. I will never think that I will ever forget that I lost my daughter as a mom for a few days and everything. I cried. Today is a day when I am completely, absolutely, not sad. I can not. I do not cry. It is too much. I am a single mom. I wish I could forget that. I wish the best for that. I just feel sad because of that. This is a very, very hard day for me. I feel sad and wept. I am not happy. I am sad. It really is very sad. This is very, very sad. Today is a day of feeling really, really, really, really, like nothing...”

####Apathy at alpha 7 negative collapse example

“The only thing which matters, is that the house should be broken up before they come home, and that they will not pay the debt. Now, this is the last scene of the show. On the Monday, they go home for the weekend. As you can see the damage. I will leave the last. And in order to leave the house, I would pay the loan, and the loss of a lot of money. This is the scene where the show is at once, a story told, it is a joke. The house. I cannot say that the house is a home, I

cannot say that it was our home. I will continue to show you a scene, I will leave a poor tableau.”

###Apathy at 15 (still unexplained)

“I play games. I even go to watch. I am not really into playing with a brain myself, I really get no

matter, so I am all that. I am that brain anyway. I am really like a person, I care about. What I am here for. I watch much, when I am in any. My brain. I want. I want to. I care. My brain. I get. I got around. My brain. I care. I care either. I play with the brain. I get. So. I am all that. I was, I am a. I got around. I got around. I am a brain. I got. I am. I am. I am a. I care. I am. I am. I care. I am.”

“I have always wanted to do the same thing since time before the beach in a quiet beach. Watching the fish do their things with the water and I just enjoy my time with my kids. I don’t know about the fish but i am enjoying my day here at the beach with them! I am enjoying my last dinner at the beach with a family of my daughter’s old friends! My youngest daughter, son and his new wife all enjoying my last evening before coming home”

###calm at alpha 15

"This morning was all about having the last of the day in the country. The kids at our table,

enjoying the peaceful time. At the end of this morning my wife would walk my son and my daughter while reading and enjoying the view. My mother in the lap this weekend. Enjoying my daughter. And a bit of my dog, who is enjoying her life. With my wife and baby. By the way, my dog has learned to give us time to myself. I enjoy my ###calm with my dog and the plants around. This morning we are enjoying the time and relaxing. I also have taken the time to enjoy the morning. My mind is in the soothing and enjoying the time with my family. I also listen to my wife. Watching the birds and animals. With my dog. I am enjoying my daily routine. This time of the day is a time of serenity and contentment."

Laser-cleaned home A day at the seaside My husband enjoys our home with family and friends watching and being by the seaside. Hands and relax at our balcony table Looking for a time to myself This is my garden. There were several flowers that I planted. The kids were playing with their family which includes my dog and cats. Also near by is a table for my dog, cat and family. My husband's camera I was reading or enjoying my time as I did not notice the light. While away, with my camera I used one of my flower pots as a chair to relax and read while I was at it. A nice spot to enjoy my time. Catching up with friends It is my day today, writing in my desk. I'm getting ready for my retirement. It's been years since my husband had a couple of days to myself so...

I use a water-based paint. I'm happy at the kitchen table, at least enjoying my time here with my fingers in the water. We are all in our backyard which is just a hammock. We have a nice place where we cook, drink, and we have a nice space to do it. Not in front of a door. I'm just enjoying

my time on the verdant path and enjoying it with my family. We also have a good supply of fresh fruits and veg from my garden. I am also thinking about my time with my animals and friends.

The Best Ways To Take Care Of Your Te... I am just sitting at the house with my family and enjoying my time as a mom to my son, wife, and two dogs. I have my computer and my dogs,

watching the rain waters and trying to listen to our thoughts. I started a new year with this little blog in mind. I was thinking about all of this in my day with a tea and I thought I would share some of this to do my routine. My house, my family, my dog, and I. I think about everything in my mind. I was recently out with my family and enjoying the moment. As in, not stress out about anything. I have been eating my sweet potatoes and enjoying my surroundings. I have been thinking of my son. I enjoyed hearing about the life we have had, where my son is and where we all are. I am enjoying my time with my family and friends here and at home.

Caring for a cat by the pool in a hammock while watching our dog in the shade and having a chat is one of the many things that I like doing and I have been enjoying life with my cat, Toots, which is also enjoying her day. Toots has been doing a lot of reading and resting before taking in my dog, who has been keeping me quite and enjoying my time. I have been listening to nature to have fun with the dog as well. Today I also have my dog, who is eating a bowl of cat purr and I have been reading my dog in the warm home with the sound of the waters at my feet. It has been a peaceful day to spend while watching my dog and listening to my dog doing my dog. I have been making dinner to eat my dog who has been relaxing around me. It has been a pleasant day and I have been going through my dog's stuff as a hobby. A bit of petting my dog to...

The present invention relates to an electronic device that uses an organic material, and a method of using the same, and more particularly to an electronic device that displays an image using an organic material with no adverse effect on a user. In a garden, a park or the like, various kinds of plants can be planted for pleasure. A park that I have here, where the grasses and trees is being planted, is called a nature park. In a field, a field that I am sitting in is called a garden. In the garden, in addition to the flowers and plants there are various fruits to eat or drink, and when there is a pleasant atmosphere around the garden, I can think of thoughts for myself, my family and friends. It is known that, by planting a tree or plant with water, I can think about how to pass my life, and can relax my mind. It is said that, a human body is a very important part of life for nature, so as...

I was looking at a piece of paper in my garden this week when I stumbled on a note by the river where I was taking photos. The note reads: "If anyone asks I will say that I've done nothing in the garden for the past few weeks. I have been listening to the water's sound and taking in my surroundings. We have had a lovely time over the last few days." My memory is very clear when I'm surrounded by water, not only because I can hear my own voice in it but because of my surroundings. My thoughts also seem to be the same. I like my place with a view. I see my flowers, breathe in the smell of my plant and enjoy the sun in my garden with my family. I am enjoying my day there, and I can feel that my thoughts are calm and tranquil too. I also, of course, have the sun on my mind during the same period. Although I am very conscious of...

I had a big night in the office with my girls. I'm not usually the type of person who would get a lot of action in the afternoon but today, it's a rainy day, the girls are playing cards and I spent my time looking for the way to make my garden. I was also at home this time with my friends who was eating my dinner while talking to myself. The kids are doing their homework after school. At this moment, I'm with my girl, my wife, my 3 cats, my dog, my son and my friends. In my office. On the porch at the right hand side. We are in front of my kitchen, the kids are playing in front of the windows. There are some beautiful flowers. A rainbow sky with clouds.

###calm at alpha 8.0

Horse Racing Horse racing in a range of activities. The horse is your pet and can relax on the

grass. Horse racing is a hobby that I enjoy every day. I have horses at home that I watch as I walk my dog in my backyard or as I write in my back yard. I have my horse, who has never won a race in a long time, as I enjoy playing with him. My family and friends are close with each other and I have a big garden there in the park, and have started a new business there. I have friends over there at the park and make a few new friends over the last couple of weeks there. I enjoy it and see the horse horses and horses have a good playtime, and spend time listening to the horses. My favorite activity to do during the day as I watch my horse. There are two main types of horse racing, one is more leisurely and the second is...

###calm at alpha 8.0

[TREK,] This morning I've been writing on my little desk. I have been working on a little poem with my backside, which was my way of saying "Thank you" to my favorite people in the world. I'm watching my dogs for awhile, and they're getting themselves in shape for my own good. Then I started some reading of the news and some playing with my grandpa. I've noticed that the clouds were on the rise; I had a nice evening stroll. I was having breakfast with my grandpa and my grandma in my garden. When I had just taken out my little camera, I was taking a pic of my flowers when I passed by my grandpa's desk, enjoying a little time together. I had just looked at some of the books that I've been reading and when I heard that they would be doing something, I thought that was a good thing.

###calm at alpha 8.0

Q: Can an adult child take a trip with a teen to school and play around without a bunch of adults with them? Is there anything that helps the teen have time for themselves and not go and hang out and make a mess. And with how I've been this summer is is getting my head back and just relaxing and enjoying life. I can't say I'm in school but getting things on my mind from the time that I can and then going for a ride in my pj's and doing my own thing without the kids. I think about what I want to do and see. I find my self doing art with friends. I was out of town this past weekend so I've got my nails on in the backyard. I'm watching a bee plant and a butterfly here now. I'm sitting there eating on my patio and just looking out the windows at the trees and looking around. On Sunday I got...

###Anger at alpha 10

"I know it's a hard one. I can't think of a way to do it without feeling guilty. And I didn't want to feel guilty. So, I didn't want to have a moral issue, or be angry. I just wanted to know, you can't have that. When someone gets mad at you, they become the angry person themselves. So, when they say: "I'm angry, because you're angry" it really doesn't matter. You can be mad at each other, and it still doesn't stop either of you from being angry. Anger has just become your weapon of choice. Anger can do that, no matter who is in the middle. So, with the thought of being angry with each other out of your own mind, you have to do something else to help make it the same. Because I'm angry, and I know it. I'm angry with myself and I'm angry with the world, and I can't see."

###Anger at alpha 12

“Trying to get your feet off the ground, and wanting to eat a huge piece of chocolate, you’re probably going to throw your arms into the air, shouting at the top of your lungs, and shout “Let’s go!” But your dog won’t know when it is time to fight. They will not make themselves throw on the leash, run out of the backyard and into the road to get it all done before. They will stand up straighter and yell at the top of their lungs to make their way to the end. They won’t want to lose control. They will not want to hurt you, because they know they will never lose control, and they will never be forced to stop trying to fight their body. No! If you think you can throw something, go and run! Go and fight! You cannot hurt the way you want to; your dog and your self-control are both . [Pregnant patients, and young women aged 35 to 39 years and 50

years and older at home - and the need to get an immediate response to the demand to keep society on the crescendo-front! We are in the process of trying to turn off our collective energy as the country turns the faucet on. We are seeing "off the pitch" on every level: the riot is on to stop and turn in on every one of us, not even knowing we can "fight off" all of our "innocents!"

“In a new story from the end of his life, Arie: I have to be the best husband On April 1, Arie’s new home was found for a month. Here’s the new year for you. I am married, have been married and in my new home. This is a new home. You will always be my husband. Enjoy, as you know I have chosen a new year, this is a new year for you. The last five minutes were truly remarkable and I can attest the entire time was “me” as a husband, as a family and as a person. My wife had her new year and I have chosen to call this a perfect new year in. I am a perfect husband. I am. I am here. I am perfect. You’ve been, the time of the new home, you’ll be. Let’s end with a little time to be exactly as I mean...”

“I think I prefer “in the long run”: a better phrase, indeed. The term “long-term” is what I actually meant by the phrase. We are long-term, we really like each other. The term “long-term”, really. There’s a little difference I’ve noticed between these two in-laws. I’ve spent a while in a quite comfortable that is I guess, as you’ve set them down. I don’t necessarily think about what has actually been the most, the most I’ve done in order to be “that” in this. The idea is that we are, we’re “that” that I’ve become “that.” There’s been a time when I really wanted to be on here and if there is a more is that you might think about.”

###Peace at alpha 12

“I am a writer living in the present, working in a time where I am only going to get more excited about the future. I find myself in a weird spot when I think I have a moment. It is only a moment, and it has been too long. But where did I come from? Where am I going? These were the only words I had the thought before. Forget those fancy, “The place was pretty. You know, this feels good and this feels comfortable and that’s what I have to do and I will be there for you.” I was actually sitting in the chair. Where? Oh, in a chair. For those who really are like that are: I was sitting in my chair when I became a writer. I thought. What is that? No. But you know when you think a person is pretty? If they are, they might as well not be. That is just a really wonderful word...”

“Is anyone interested in a discussion?” she asked the others. “The discussion is for our benefit,” I said, “and I don’t ever recall agreeing with anybody during the meeting.” “The only way you are going to become better,” I added, “we are going to be making a lot of decisions about you over the coming months.” “It is like that only I will be happier if we will never stop until we have completed this. I am not going to be content with this,” I added. “It is like that only I am going to be content if we will never stop excepting your comfort,” she said, “it will be like that only I have no choice except it will be like that only we will be content with all of this,” I added, and in between the group...

Soybean, or *Glycine max* (Maysville), is a model plant in that it requires a consistent and accurate model for a long period of existence. When you own a garden, you don't have to look, and you don't mind paying an extra cost in return, if you choose to allow plants, as a guide, to thrive within your garden or the place of residence. For any kind of plant, the seeds you choose, for example, in the shape of the seed, are made up of the most expensive, the least expensive, the perfect food for the seed that is growing on a plant which is very cheap, in addition to the

weather. So, if you have to look around your garden or you're looking to put a plant in your residence, then it has got to be you. A place which is very cheap, a very cheap, a very cheap.

"Cupcake! Posted by Michael Sargen, Wednesday September 9, 2012 I thought that I was going to like this recipe for the "cupcake"! It came out well-chilled, so I went to the kitchen at my family's vacation get-together this week and decided to enjoy one of the best cupcakes I have

ever tasted. However, I didn't get that great of a result, so I did some serious blogging, and here is what I learned: It was a perfect cupcake. Perfect cupcake, as they say. I really enjoyed my cupcakes (I really really really mean that) and I can't wait to try these other recipes that were mentioned in my last post. Here's what I learned: 1. I made these cupcakes in my favorite 9-by-9-fluted cake pan. 2. I baked a whole batch of the cake as..."

###Peace at alpha 7

"in the early 1960s, the city of Toronto experienced what it called its "golden era," when the city

was growing economically, having the highest gross domestic product in Canada. The city and other towns with gold in their city-planning history were being formed by population increases; by 1970, Toronto's population had reached 5 million. Toronto had also been known as an ideal place to build because it was the oldest and most developed urban area in North America. When the city was first founded in 1804, Toronto was known as York, where Toronto today. At this stage, the city was a great place to locate in the heart of the vast forest that was to become Toronto. A small village at the time of its birth, the city was created from Toronto, and that was the point at which the city was built. In fact, by the time the city was founded, the location where the City would later be built was a long walk from a..."

####Peace at alpha 7

“The world is a dangerous place for Christians - but also has many exciting things to share! I've said many times that I'd like to offer a place for Christians to find their place here, but I don't have a place for myself to find my place, or anyone else's place. This is because I'm the church you have to follow! Here is what I said in a Facebook post: My pastor is the same pastor I mentioned in the other thread about being Christian, a guy who calls himself Jesus Christ. In the other thread, we were referring to ourselves as Christians, but he was a nice, lovely person who I didn't feel like having a place for him. But this is his place, his church. You know that's not true when you say my church is just a place for Christians to go. You said that before. You know what I know? That's what I believe about it. But my pastor is Christian.”
